Re: Victor's Main Street striping plan.

Dear Council members and Mayor:

Kudos for the public-friendly flyer regarding Victor's proposed Main Street striping plan. As you well know, Main Street has historically been a tough place for pedestrians and cyclists because of the tendency for people to speed through town. We support the proposed changes because they will slow down traffic and promote a system for cyclists and vehicles to share the road. You have designed a visionary road plan for Victor.

Like any new plan that introduces changes to which people may not be accustomed, public education and clear signage will be key. I am sure the residents of Victor will catch on quickly, since most folks are keenly aware of the need for a new design that will make Main Street safer, and will soon become familiar with the new system. In that same vein, VARD supports your ongoing efforts to create a road design that is clear and user-friendly so that visitors and people just passing through town will understand how to park their car, and who yields to whom.

Thank you for the opportunity to provide comments. Keep up all of your good work.

Sincerely,

Anna Trentadue  
VARD Program

CC: Cari Golden, Bill Knight, Craig Sherman.
